## **ACKNOWLEDGEMENT**

On behalf of myself, I would like to thank all members of group 1 for your hard work and contribution towards the completion of this eProject. I would also like to show my gratitude for Mr. Pham Cong Danh for his valuable assistance during both the planning and development phase. Finally, I would like to thank Aptech for allowing us the opportunity to hone our programming skills and test ourselves on real-life problems. Thank you!.

## **SYNOPSIS**

Origami originated from China and was popularized in Japan. It is the art of paper folding. Paper-folding is a wonderful hobby and a wonderful group activity... and for kids it has so many benefits socially and for the developing mind. The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

## **PROBLEM DEFINITION**

The Web site is to be created based on the following requirements.

- 1) The home page must describe the keywords or highlight the origami designs with all navigation links defined.
- 2) The site should provide the brief information about origami as from where it originated etc.
- 3) There should be a well designed menu with necessary sub menu options.
- 4) There should be various categories (forms and styles) like easy for kids, complex for elders.
- 5) There should also be categories of designs as Faces, animals, birds, flowers etc. Minimum 10 categories are expected here.
- 6) Proper description of the design along with the image and steps must be added in the website.
- 7) Contact Us
- 8) About Us
- 9) Feedback form
- 10) Gallery section should be added.
- 11) Color combination must be uniform throughout the project.
- 12) Navigation must be smooth.

# CUSTOMER'S REQUIREMENTS SPECIFICATIONS (CRS)

Client: Origami

## **Business/Project Objective:**

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you JavaScript/Dreamweaver but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of **HTML5**. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back at [eprojects@aptech.ac.in](mailto:eprojects@aptech.ac.in) in case of any doubts regarding the application or its objectives.

## **Input to the system:**

- Browsing products based on brands, type of equipment...

## **Output from the system:**

- A menu that will categorize all the functions of the site.
- Display the list of available products category wisely.
- Site should be able to provide brief introduction/history about the company under About Us page.
- Besides the above requirements, the site should have look and feel as per the industry standards.

**Expected delivery date:** 13-Mar-2024.

## **List of deliverables:**

- Document Word.
- User Guide.
- Source code.

## **Hardware/ Software Requirements:**

### **Hardware**

A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better.  
64 Megabytes of RAM or better.

### **Software**

Notepad/HTML editor/CoffeeCup  
Agular/Angular JS/React/BootStrap  
Dreamweaver, VisualStudioCode.  
IE 5.0/ Netscape 6.0.

## **SCOPE OF THE WORK (IN BRIEF)**

**I have discussed with myself and agreed upon the website layout shown as below:**

**1: Home: showing brief introduction about the origami original, operating philosophy.**

**keywords the origami designs with all navigation links defined. The customer could login and register to become member of the OGRM or Buy the origami guide book . show logo of partner unit.**

**2: About us: detail about the origami original , benefit in Therapy. Show brief develop history of ORGM. Information about the board of directors**

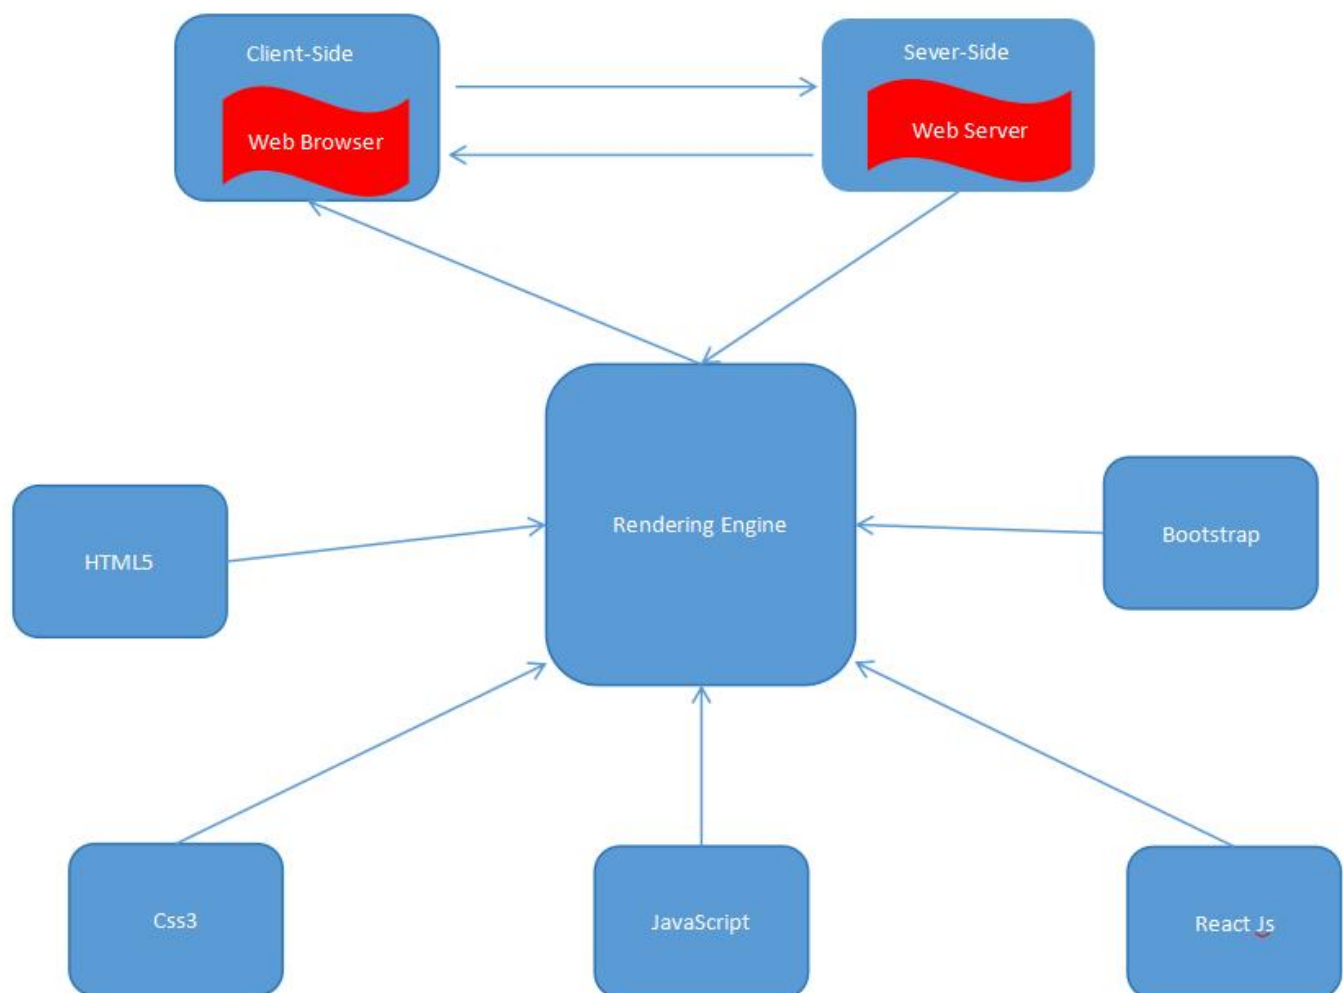

**3: Category: containing various categories for kids and adult with their details content and image, video**

**4: Gallery: show image of the origami product designed by the ORGM**

**5: Contact us: Gmail , Google map, phone, adresss, Time of work**

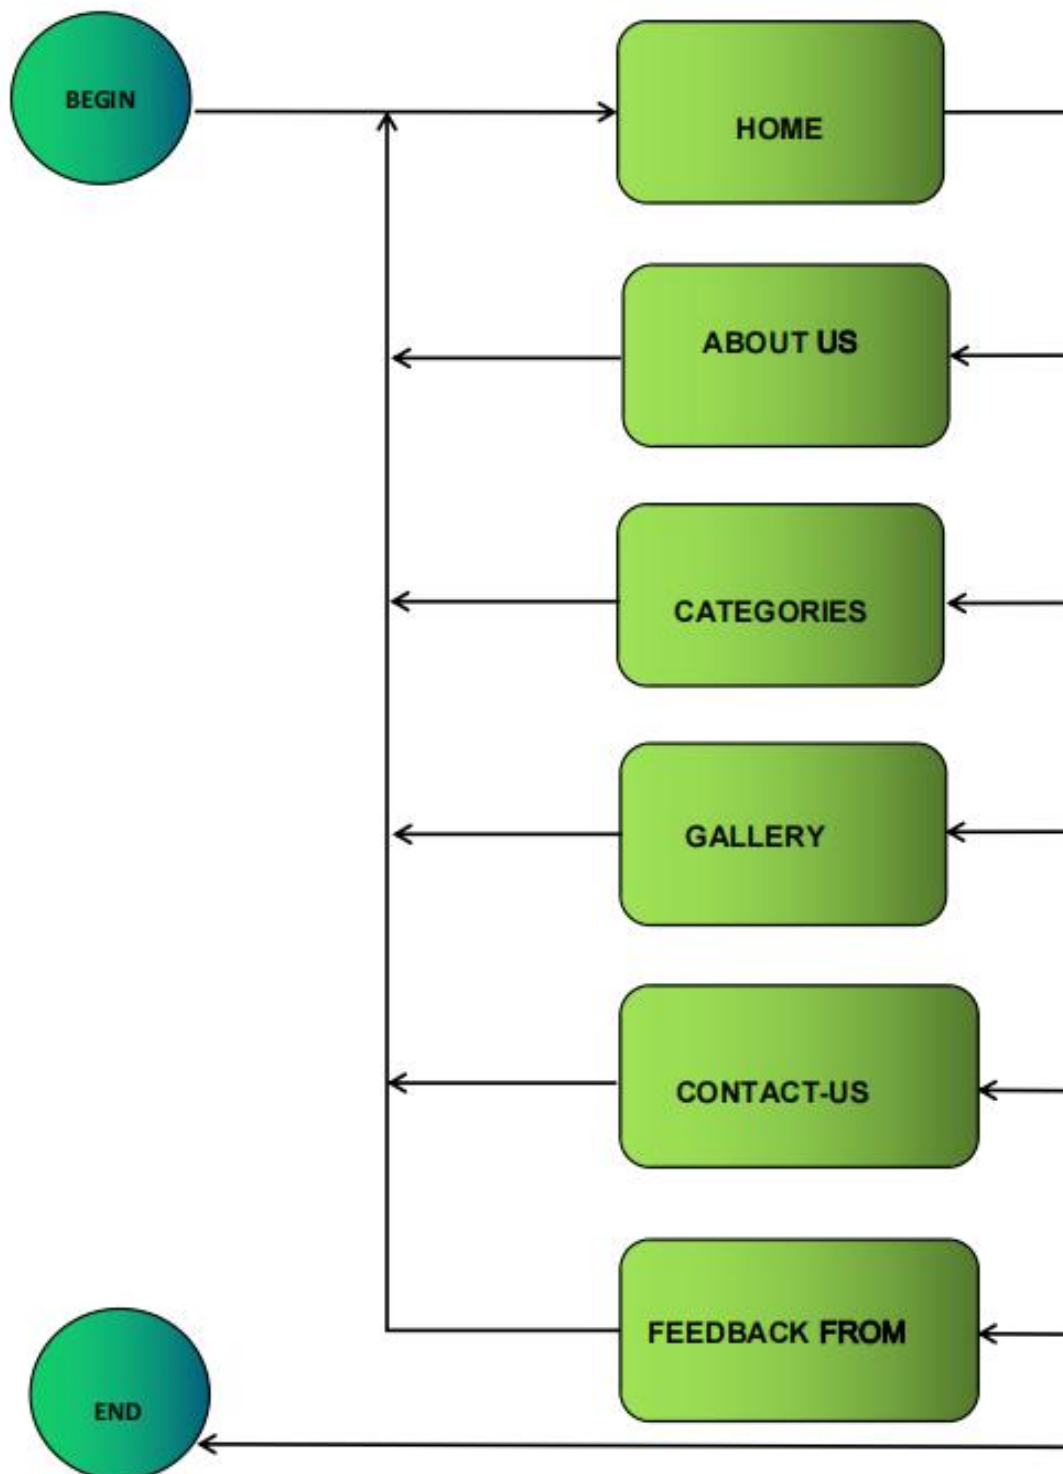

**6: Feedback form: the level of saticfaction of customer about content, image, video of categories for kids, adult and the origami guide book.**

### A brief history of origami

There is much debate about the true history of origami.No one knows exactly where or when origami first began. Paper is one of the first things to degrade and disappear. Most people think that origami was first invented in China, but this may not be true at all. We do know that paper was first invented in China during the first century A.D. Paper was then brought from China to Japan by Buddhist monks during the sixth century A.D.....[More read](#)

### Effects on psychology

Origami is a gentle, meticulous art. It has proven in many cases to have a calming effect on the nerves, cure insomnia and fight stress. Many doctors and physical therapists use origami as a beneficial physical and mental therapy. Dr. Ronald S. Levy, at the Second International Conference on origami for education and therapy, called for the use of origami for hand rehabilitation and therapy.....[More read](#)

## Kawaii Origami Book

### Kawaii Origami – Super Cute Origami Projects for Easy Folding Fun

I'm pleased to present my first origami book – 'Kawaii Origami', which includes over 25 cute origami projects ranging from easy to advanced. Kawaii Origami has everything you need to make your very own Kawaii origami creations. From an origami ice cream cone to a cute origami cat in a heart! Includes 50 sheets of origami paper and over 25 Kawaii-style origami projects with step-by-step instructions. Creating a proper published origami book was what I thought of as an 'unattainable goal' so I am super thankful to the people at Quarto for their help and cute formatting of the book! Kawaii Origami is published by Race Point Publishing through Quarto. The book is in diagram format with a text description for each step. Some of the models included also have video tutorials that go with them. Kawaii Origami was published on 2nd April 2019. An ebook version is also available on Amazon.

## II.ABOUT-US

### A brief history of origami

There is much debate about the true history of origami. No one knows exactly where or when origami first began. Paper is one of the first things to degrade and disappear. Most people think that origami was first invented in China, but this may not be true at all. We do know that paper was first invented in China during the first century A.D. Paper was then brought from China to Japan by Buddhist monks during the sixth century A.D. However there is also a lot of examples of origami in other countries, and where there is paper, there is bound to have been some folding going on!

Origami became a very prominent art form in Japan and in Europe from as early as 1490. One of the oldest documents written about origami is the 'Senbazuru Orikita', which translates to 'One Thousand Origami Cranes', and was written in around 1797. 'The oldest unequivocal document of origami is a short poem composed by Ihara Saikaku in 1680. It reads: Rosei-ga yume-no cho-wa orisue (The butterflies in Rosei's dream would be origami.) Here he referred to an origami model called Ocho Mecho (Male and Female Butterflies) as "orisue." We use it to wrap sake bottles mainly at the wedding ceremony.' – <https://origami.ousaan.com/library/historye.html> Origami has gone through many different styles, including very loosely folded origami in Japan that had no exact fold (origami.) Here he referred to an origami model called Ocho Mecho (Male and Female Butterflies) as "orisue." We use it to wrap sake bottles mainly at the wedding ceremony.' – <https://origami.ousaan.com/library/historye.html> Origami has gone through many different styles, including very loosely folded origami in Japan that had no exact fold position, it was up to personal taste to decide the shape. On the other hand, European origami, traditionally had more measuring and aligning involved. Modern origami all around the world today has taken a more exact method. Diagrams are like architectural drawings, crisp and precise. The final model should look exactly as the designer intended.

### Origami in Therapy

Origami is the Japanese art of paper folding. Created pieces are often made from a single sheet of paper that has been folded without any cutting involved. More involved pieces may be assembled from more than one piece. A related art form, kirigami, involves both folded and cut paper. I have always been fascinated by origami—it amazes me the multitude of things that can be created from folding a single piece of paper. It was not until another psychotherapist gave a training at my clinic, however, that I even thought about incorporating it in to therapy. Art therapy often encourages art methods that allow for individual, creative expression. In contrast, origami involves carefully following a set pattern in order to create the chosen object. I have found, however, that the process of creating a piece of origami can be very beneficial in therapy.

#### How can origami be used in therapy ?

##### 1. Building attention and focus:

Origami can be a great activity to help children with ADHD to build attention because it requires focus and concentration to be successful. In addition, you must follow the steps as they are written and constantly evaluate your work, which are important skills for children to learn. I have found that even the most distractible kids can be engaged in origami and are motivated to successfully complete their piece.

##### 2. Building frustration tolerance:

There is no doubt that origami can be frustrating at times. This makes it a perfect activity to help children build their ability to stick with something, even when it is difficult. At times, I have prompted a frustrated child to stop, take a few deep breaths, try again, and ask for help if needed. I will then talk with the child about how they can do the same thing when struggling with something else, like homework, instead of just giving up or getting angry. As a therapist, you can also be a good model of this. If you are having difficulty with an origami step, you can demonstrate calm perseverance as you work together to figure it out.

##### 3. Practicing positive self-statements:

I often help kids to notice their self-talk as they approach a difficult project or point out negative comments they make. We can then talk about how these thoughts may be unhelpful and how they can practice more positive statements-replacing "I can't" with "I can do this."

### Development history of ORGM

Since 2009  
15  
years

ORGM's predecessor was initiated by a group of "youth volunteers" working with the purpose of supporting the care and protection of street children by creating conditions and opportunities for children to meet their basic needs.

- Children leave this at-risk street environment to live in a safe environment.
- Children receive counseling to return home and reintegrate into family and society.

The Huynh Van Nghe street child care program was born in such a context.
